

End Ecocide Emergency Fund

This Fund support poor and climate-vulnerable developing countries in establishing Ecocide Law as an international law. We wish thereby to create a level playing field in the context of tabling and establishing Ecocide Law where:

- i) the voices of these countries may be clearly heard and valued by relevant bodies and organisations as well as the international community;
- ii) the highest purpose of Ecocide Law is best forwarded.

Specifically, we wish this fund to enable these countries to:

- a comfortably send representatives to the International Criminal Court in the Hague, the UN Trusteeship Council in New York and any other travel that for the best may facilitate the establishment of Ecocide Law;
- b access legal, financial, practical and moral support where required for any and all procedures that for the best may forward this intent.

We wish moreover this intent to attract any and all groups, individuals and organisations who may for the best

- 1 contribute to the Fund and its work whether financially or in kind in the spirit of freely gifting for a fairer, healthier and more beautiful world;
- 2 ensure that funds and resources raised are distributed efficiently and for the best in the spirit of fairness, transparency and justice;
- 3 publicise, promote and spread the word about the Fund in whatever way is for the best and in alignment with this intent;
